I enjoy creating things that live on the internet. I am eager to constantly learn new things. At the moment, my focus is on :

=>Building intuitive, engaging and progressive user interactions for Android.

=>Delivering well-defined features of small to medium complexity on a regular basis.

=>Debugging and fixing issues in development, testing, and production.

=>To participate in software design for features and bug fixes.

## EDUCATION

**SRM institute of science of technology**  
Bachelors of Science, computer science

7.3/10(3 sem)

**Maharaja Agarsain public School**  
Inter School, Science with  
Mathematics

10th-88% 12th-  
78.6%

## PROJECTS

### Netflix\_clone\_ui

netflix clone ui using BLoc state management in flutter
